Alejandro Berruezo Márquez

Digital transformation, AI adoption and portfolio and program governance

Madrid, Spain | +34 620 316 370 | aberruezo@gmail.com | linkedin.com/in/alejandro-berruezo

Profile

For 30 years I have been getting technology into real work in organizations with many stakeholders and heavy regulation: public sector, private banking, industry and services.

I combine strategy and governance of digital transformation with AI adoption and business development. I have governed programs of more than 300 professionals, managed portfolios of solutions and bids, built business cases and roadmaps, and led teams of up to 25 people. I am a computer engineer with a master's in Big Data and Business Analytics. Today I focus on landing the models I implement and getting them running, until they reach cruising speed. I formalized this in Synergós, my own method for leading AI transformations, which I publish every week.

What I bring

AI and digital transformation strategy

Strategies, target models and executable roadmaps in the public sector and regulated environments. Own method, Synergós: what is gained, what is known and who is accountable before an AI project is approved.

Portfolio, programs and governance

Governance of the digital transformation of the GISS, with more than 300 professionals across engineering, architecture, product, operations and the client's leadership. Gate committee with prior criteria and a decision log.

Business cases and value

Business cases and measurement with a baseline and paired indicators (speed with quality, cost with satisfaction). Over €500M in bids led, with a win rate close to 50%.

Bridge between technology and business

Presales, architecture, product and client leadership at the same table. Support to the GISS steering committee and proposals above €30M with bid teams of more than 12 people.

Commercial and bid processes

Defined, implemented and audited opportunity-management procedures at Getronics: 3,800 opportunities a year and a win rate of 11 to 19%. ITIL certified, ISO 9001 and CMMi.

AI adoption and ecosystems

Daily use of generative AI and analysis of its risks. More than 30 partners a year with joint plans at Getronics, and MINEsait inside Minsait, a collaborative innovation ecosystem.

Jun 2019 to present
Madrid, hybrid

Senior Manager / Principal, Digital Transformation, Presales and Projects

Minsait (Indra)

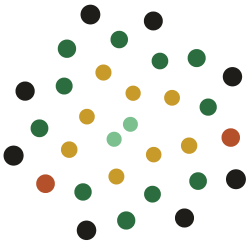

+€500M	≈50%	+€30M	+12	400
in bids led	win rate on key opportunities	largest proposals	people on bid teams	people in the services bid

Digital transformation of the GISS

- Spain's Social Security IT Management (GISS): leading a program of more than 300 professionals.
- Governance model across engineering, architecture, product, operations and the client's leadership, and support to its steering committee on the decisions of each phase.

- Governance of technology platforms, products and ecosystems; transformation strategies, target models and executable roadmaps in the public sector and large regulated environments.
- **New ways of working.** Creation of MINEsait inside Minsait, a collaborative innovation and intrapreneurship ecosystem that changes how teams organize and work together.
- **Applied innovation, with method.** I take it into real programs with written criteria, owners and decision gates, the approach I have formalized in Synergós.

Career

- 1996 to 1998 — **Software AG and Thales** Programmer, with Telefónica and the GISS as clients
- 1998 to 2006 — **Nexus IT and Business Integration (BT)** Presales, consulting and projects
- 2006 to 2017 — **Getronics (formerly Thales)** From presales to leading alliances and offers
- 2017 to 2019 — **Studies and Enzyme** Big Data master's and nine months setting up an office
- 2019 to present — **Minsait (Indra)** Governance of the GISS digital transformation

One seed per year, 1996 to 2026, placed at the golden angle of 137.5 degrees, the same as the Synergós sunflower.

Before Minsait

Senior Manager and Presales Manager

Sep 2018 to May 2019

Enzyme Advising Group, Madrid

≈10	≈25	€0.8 to 0.9M
people in the Madrid office	opportunities in the pipeline	approximate total volume

- Set up the Madrid office, with services support from Barcelona: presales, business development and strategic accounts.

Presales, Alliances & Offering Director

May 2012 to Feb 2017

Getronics, Madrid

25	3,800	+€400M	11 to 19%	-20%
people in charge	opportunities a year	volume	win rate	area cost in 3 years

- Led presales, business development and consulting.
- Alliances, almost nonexistent until then: more than 30 partners a year with joint plans and commitment tracking, about 12% more opportunities.
- Portfolio of more than 50 digital transformation solutions, with 8% more opportunities a year. Integration of teams and processes.

Presales & Bid Director

Dec 2010 to May 2012

Getronics. National presales focused on Public Administration. Defined, implemented and audited the opportunity-management procedures.

Presales Manager

Jun 2006 to Nov 2010

Getronics (formerly Thales). Coordinated technical presales; defined, launched and audited opportunity and project procedures.

Presales Engineer, Consultant and Project Manager

Feb 1998 to May 2006

Nexus IT and later Business Integration (BT). Solutions, estimating and project management; quality plans, operating manuals and service transition.

Programmer

1996 to 1998

Software AG (Natural and Adabas, for Telefónica) and Thales (at the GISS, the body I have governed since 2019).

Entrepreneurship

Founder, Synergós

2024 to present

Own method for leading transformations with AI, rooted in MINEsait. Version 1.5. Gate committee built into program governance, a four-level autonomy scale with criteria, owner and log, and an inventory of systems and risks with a people and knowledge column.

Co-founder, Hestía, your home!

Dec 2016 to present

Own tourist accommodation in Vera Playa, Almería, running for almost ten years and a local reference: operations, marketing and customer relations.

Education and skills

Education

Computer Engineering (Ingeniero Superior en Informática), Universidad Autónoma de Madrid, 1996

Advanced Management Program and Executive Business Administration Program, IE Business School, 2017

Master in Big Data and Business Analytics, MSMK, 2018

Operational excellence, BTS, 2025

Certifications and languages

Certified Scrum Master, 2018

Design Thinking Professional, 2024

ITIL (EXIN), 2008

Spanish native; English B2, First Certificate, University of Edinburgh

Sectors and technology

Public Administration · Social Security · Private banking · Industry · Health and services · Retail

Cloud, APIs, DevOps, big data, Scrum and Lean, generative AI, ITIL, ISO 9001 and CMMi.
